

# StuWireless Setup for the iPad

You must register your device online before it can connect to StuWireless. To register, you first need to find a set of numbers from the iPad.

1. On your iPad, tap **Settings** and navigate to **General** and then **About**. Scroll down toward the end of the screen and look for **Wi-Fi Address**. Write down the numbers shown.

2. On a computer with an Internet connection, login to **my.tcu.edu** using your username and password.
3. Click on **Helpful Links**. From the drop-down menu or main window, click **TCU Network Registration**.
4. Read the TCU Computing Resources Policy and click **Accept** to continue. On the TCU Network Registration page, click on **Insert New Address**.
5. Under **\*Subnet**, choose **Student-Wireless**. For **\*Computer Type**, select **iPad or other Ebook platform**.

# TCU Network Registration

**Instructions** : Please enter or modify your ethernet address and computer type and hit the save button.

The address will appear in this format: XX-XX-XX-XX-XX-XX

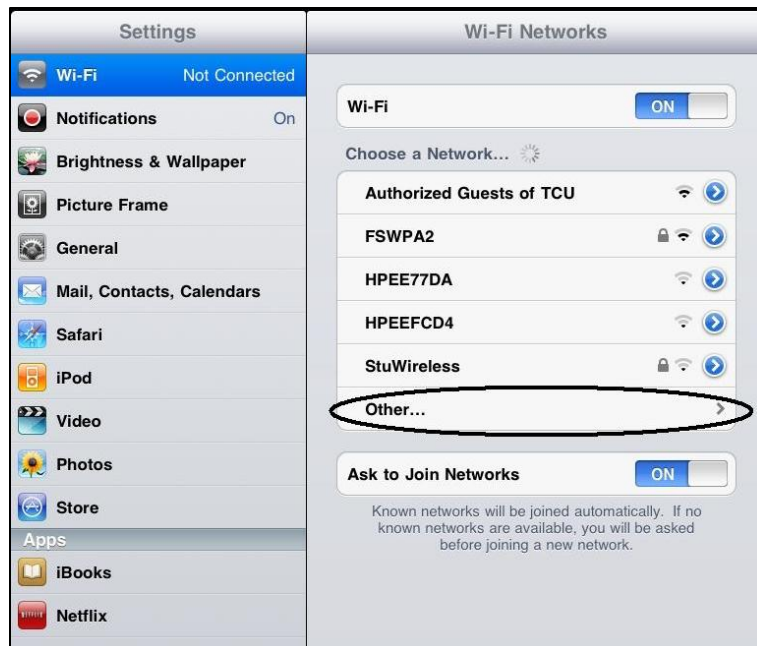

- You may register up to 4 devices on the Wireless or Resnet (Wired) networks.
- If you need to unregister a computer, select the check box next to the device you wish to delete, then click the "Delete Address" button at the bottom of this page.
- Please contact the Computer Help Desk at 817-257-5855 for further assistance.

The screenshot shows a web browser window with a table for device registration. The table has columns for 'Select for Deletion', '\*Subnet', '\*Computer Type', 'Ethernet Address', and '\*My Description'. The first row shows a checked box for deletion, 'Student-Wireless' for subnet, 'iPad or other Ebook platform' for computer type, and empty fields for the address and description. Below the table are three buttons: 'Insert New Address', 'Delete Address', and 'Save'.

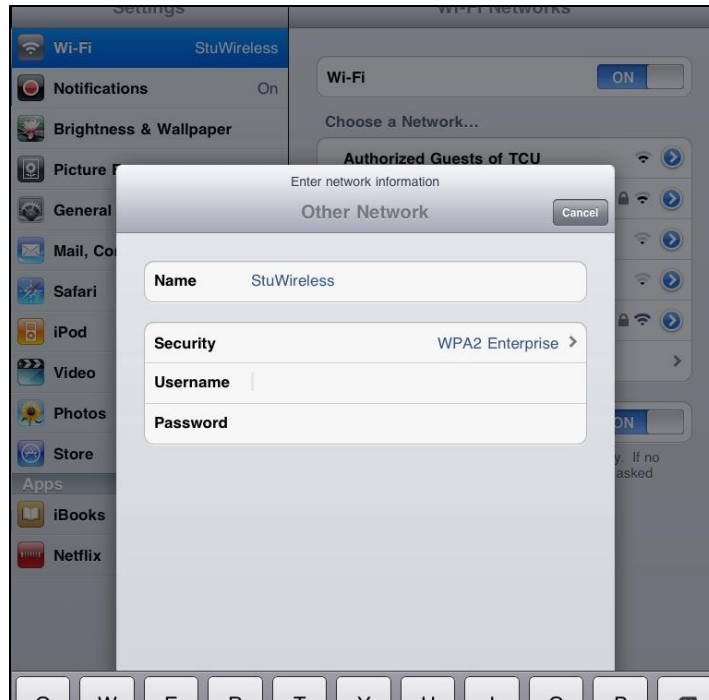

Select for Deletion	*Subnet	*Computer Type	Ethernet Address	*My Description
1 <input checked="" type="checkbox"/>	Student-Wireless	iPad or other Ebook platform		

Buttons: Insert New Address, Delete Address, Save

6. In the **Ethernet Address**, type in the **Wi-Fi Address** you wrote down earlier, no punctuation necessary.
7. Underneath **\*My Description**, enter a small description of the registration for future reference, i.e. "Froggie's iPad."
8. Click **Save**. Your device has been registered for the TCU Network.
9. Going back to your iPad, tap **Settings** and then **Wi-Fi**. Instead of choosing to join StuWireless, select **Other**.

10. For network name, type **StuWireless**. Under the **Security** option, select **WPA2 Enterprise**. Tap **Other Network** return to the network screen.
11. Below **Security**, type your TCU username and password.

12. Select **Join** and wait for your iPad to connect to StuWireless.

**IMPORTANT:**

Some devices require a restart after you have registered and setup StuWireless. Restart your iPad and then try to connect.
