

Android Setup on StuWireless

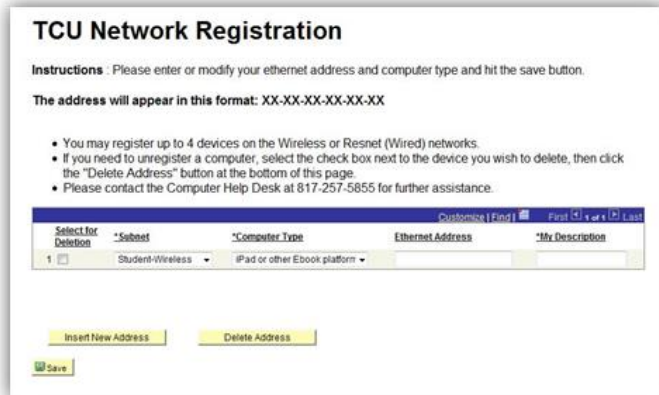

Warning: You must register your device online before it can connect to StuWireless.

To register, you first need to find the MAC address of your wireless card.

1. On your phone, navigate to the **Settings** menu.
2. Then select **About phone**.
3. Under **About phone**, select **Status**.
4. Under **Status**, you should see **WiFi MAC Address**. This is what will need to be registered.
5. On a computer, sign into your **my.tcu.edu** account.
6. Under the **Student Quick Links**, select **TCU Network Registration**.

7. Click **Insert New Address**.

8. Under ***Subnet**, select **Student-Wireless**. For ***Computer Type**, select **Mobile Device**.
9. In the **Ethernet Address** field, type in the **WiFi MAC Address** that was found on your phone.
10. The ***My Description** field can be filled in as you wish. After saving the registration, go back to the **WiFi** section under settings on your phone.
11. Select **StuWireless**.

12. The **EAP Method** should be **PEAP**.
13. **Phase 2 authentication** should be changed to **MSCHAPV2**.
14. Leave the certificates as **(unspecified)**.
15. Enter in your TCU username under **Identity**.
16. Put in your TCU password under **Password**.
17. Hit **Connect**.
